

ATTEND Event Module for Episerver

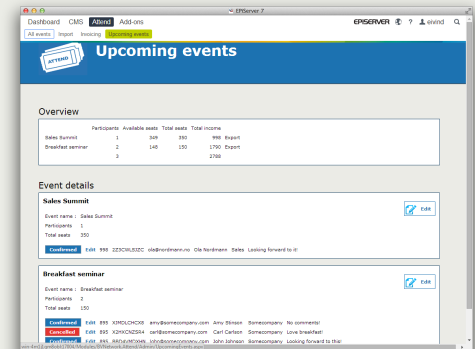

Event Editors

- Set start and stop time for both event and registration periods
- Limit number of seats
- Add multiple sessions to each event for track management
- Easy to use e-mail templates for each event
- All events and participants are created and updated just like other Episerver content

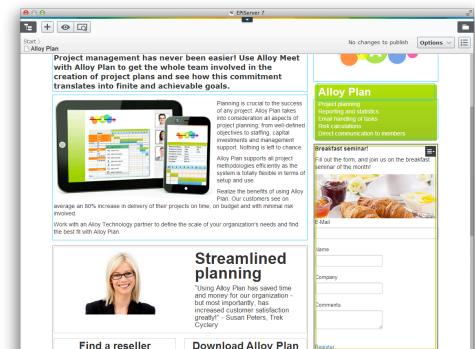

Event Administrators

- Full event and session overview with participants and status
- Search for events and participants
- Price management
- Invoicing overview
- Register attendees upon arrival

Site Owners

- Ready to use through Add-On Store!
- Uses Episerver XForms to create form, and store participant data for different events
- Create event pages, and configure the event
- Drag event pages to content areas to use with your existing templates
- No programming skills needed
- Full globalization support (Norwegian and English included)

Developers

- Both MVC and WebForms
- Supporting Episerver 7.5 and higher
- Create your own templates to add design and business logic
- Send your own status mails through events
- Install NuGet to access Attend API
